This letter is not certification of any specific project

The AWI Quality Certification Program (QCP) is a valuable quality assurance tool that ensures custom, interior architectural woodwork, one of the most highly visible aspects of many construction projects. It has been endorsed by the General Services Administration (GSA) and the American Subcontractors Association (ASA).

Licensee credentials are earned by woodworking firms who, through comprehensive testing and inspection, demonstrate the ability to fabricate, finish and/or install work in accordance with the quality grade criteria set forth in the Architectural Woodwork Standards (AWS).
