George J. Reitz, Jr.
American Millwork & Cabinetry, Inc.
840 Broad Street
Emmaus, Pa 18049

Dear George:

When the East Penn School District required two new science laboratories at the Emmaus High School for the 2018 school year, and realized that they only had the summer of 2018 to get the project completed and needed the science lab casework fabricated and installed in less than 8 weeks, they knew that they were asking for a miracle. With a nearly impossible task upon the project, *American Millwork & Cabinetry* stepped up to the plate and not only competitively bid the project but took it upon themselves to perform admirably within the limits given to them by the school district. Your staff worked extremely close with our office to develop the shop drawings, coordinate the casework with all of the associated utilities and then delivered the product on time and installed with perfection.

When you have good representatives, it can only reflect favorably on the company, its products and services. Our experience with American Millwork on this and other projects have been nothing less than professional and proficient.

We would like to thank you for your outstanding ability to work under less than ideal time constraints and your company's attention to the details of the project. You always keep the client's best interest in mind and always give us the impression of a 100 percent effort on every project.

This letter should serve as a very well deserved thank you and an honest professional reference for a job well done.

Sincerely

Salvatore B. Verrastro, AIA, FCSI, CCS, CCCA, NCARB
